Internal Adjustment

Louvre & glass combination

Fixed frame -window protection

Whether for Practical reasons or purely - as; an Aesthetic solution this truly is

Applications are wide and varied with a strong emphasis on balcony enclosures, room dividers and window protection, where privacy and sun shading is required.

Available as a fixed or adjustable blade, these type of louvres can be mounted directly to the facade of a building or supplied within it's own framework.

The adjustable louvre system allows you to control the amount of light and airflow, or have them fully closed and even locked for added security.

The aluminium frames and blades can be supplied in anodised or powder coated finishes, to the colour of your choice.

The 90mm louvre blade has been specifically designed and engineered to cope with all types of weather conditions and have been tested for noise, wind load and resistance to wind pressures for cyclone regions.

Energy Efficient - Energy Savings

Louvre shutters are custom made to suit your specific requirements and available in a number of different configurations such as fixed, adjustable, stacking, bi-folding, sliding, hinged etc.
